# About The Producer

Steven Nikolic is a veteran music producer and mixing engineer who has been composing, mixing, and mastering music for himself and others for the past 17 years. Having been in music production for the better half of his life, he has seen work in almost every genre of music production: electronic, dance, pop, rock, industrial, hip hop, ambient, classical and soundtrack. As founder of **platinumaudiolab.com** his focus has been in promoting digital based music-making for everyone.

*"When I was 16 I got my first computer and was so excited to discover a world of possibility open up for me in music production... At the time the Internet was still in its infancy and information and applications were scarce, but even back then I was like a man possessed, running around soaking up all of the tools and information I could... I couldn't believe that we were seeing the beginnings of a music recording revolution and I was there at the start... I was quite aware of that, and it's amazing to see how far things have come."*

*"I am endlessly interested in keeping up with what's new, adding to and improving my own skills and repertoire...and passing on and exchanging skills with newcomers... If you broaden the base, it just opens up more opportunities for everyone. The worst thing is becoming static and stale... I am never too proud to keep myself from learning from those that have only been around this a short while... I don't think I will ever stop learning; if I do, I would just quit altogether."*

Steven is always open to collaboration or listening to new material. Some of his original work can be found on SoundCloud **www.soundcloud.com/snikolicproducer**
