# Platinum Audiolab Nanostudio Preset Banks - Getting Started
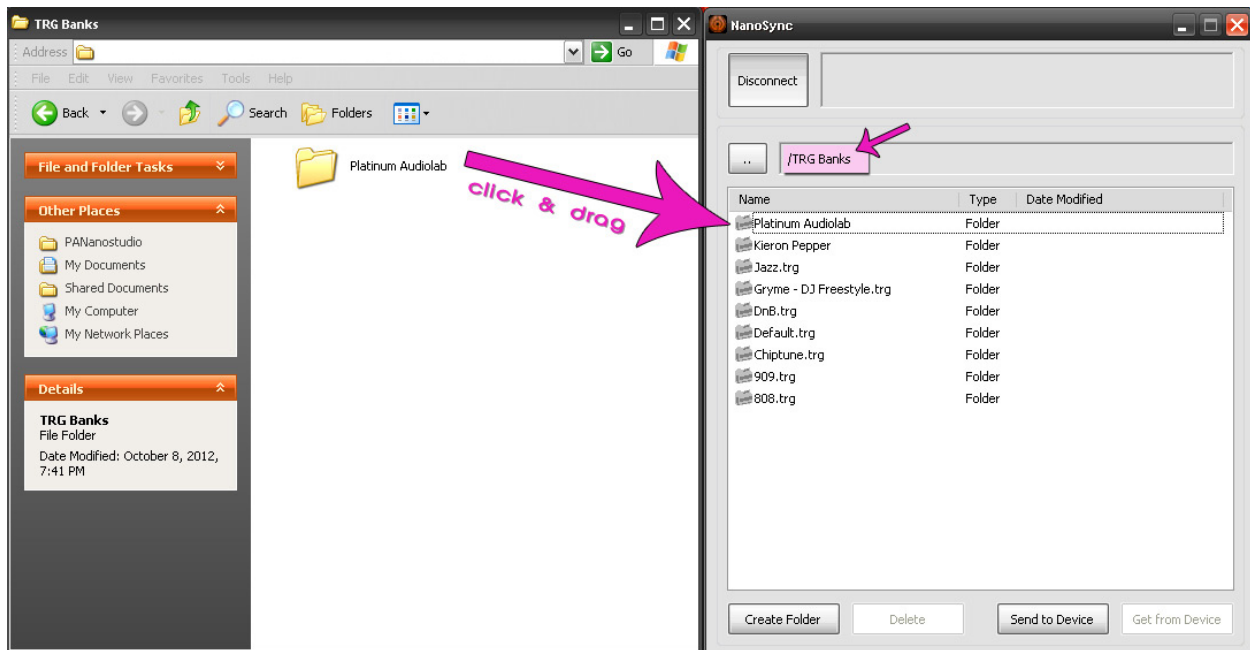

Thanks for taking the time to check out our custom preset banks for Blip Interactive's Nanostudio. This package was developed on, and for, the iOS installment of Nanostudio version 1.33, and operation is not guaranteed on earlier versions. Please visit the app store to make sure your version is up to date before using. So long as it remains free, this package will be hosted at the link given below. If you intend to share the file, please use this link:

www.platinumaudiolab.com/free_stuff/nanostudio/ios/platinumaudiolab_nanostudio_banks.zip

All of the Platinum Audiolab produced EDEN (the Nanostudio synth/sampler) presets are contained in the PlatinumAudiolabNS.nsp file. Using nanosync, add the nsp to your Nanostudio projects folder (see picture below). When you load the nsp within Nanostudio it will also load a demo track featuring a portion of our Eden presets. Open up any of the Eden tracks in the demo and you will find that the 'Project' bank contains all of the Platinum Audiolab presets spanning P00 to P63. To use these presets in your own projects, you can simply delete the parts in the sequencer and save the project as a blank slate that you can then open up and use as a starting point in future projects. Another option is to manually save each preset into an available preset slot in Bank C, thereby allowing you to use the presets globally in any project.

To make use of our TRG drumkit presets, just add the 'Platinum Audiolab' folder to your TRG Banks folder using nanosync (see picture below). You can then import each kit using the bank import feature in TRG-16 within Nanostudio.

EDEN BANKS [P00 - P19] - All of these presets are made purely by using the built-in synthesizer oscillators. Expressions were added to the XY pads for some presets.

EDEN BANKS [P20 - P43] - All of these presets are founded on single samples pulled and resampled from our sample and loop libraries **Wobble Bass, Industrial Strength Toolbox,** and **West Coast Hip Hop Producer** exclusively for Nanostudio. Expressions were added to the XY pads for some presets. Try using the XY to control the amount of wobbly goodness!

EDEN BANKS [P44 - P63] - All of these presets are founded on single samples pulled and resampled from our sample libraries **Complete Orchestra Ensemble, Twisted Soundscapes,** and **Essential Pianos** exclusively for Nanostudio. Adjust the attack and release envelope to reflect the tempo of your recording and get a more realistic sounding performance.

TRG BANKS [PROMIX] - These individual drum hits were pulled from our sample libraries **East Coast Hip Hop Producer, Electronic Producer Essentials, West Coast Hip Hop Producer, Westside Fusion,** and **industrial Strength Toolbox**.

TRG BANKS [SRD] - These individual drum hits were pulled from our sample library **Studio Rock Drums**.

TRG BANKS [PHHBH] - These individual drum hits were pulled from our sample library **Premium Hip Hop Drum Kits In HD**.

TRG BANKS [UMHH] - These individual drum hits were pulled from our 3-volume sample library series **Ultra Massive Hip Hop Drums**.

TRG BANKS [UMDADU] - These individual drum hits were pulled from our sample libraries **Ultra Massive Dance Drums** and **Ultra Massive Dubstep Drums**.

SONG [PLATINUMAUDIOLAB] - The demo track you hear was fully produced in Nanostudio and is included as a part of the sample and loop library **Wobble Bass**.

Platinum Audiolab Nanostudio Preset Banks - License and Usage

All of the included Eden Banks and TRG Drumkits can be used free of license exclusively with Nanostudio only. The sounds and banks are for composing original works within Nanostudio only and can not be used as a part of any other software for the purposes of recording or otherwise. This license exclusivity is for the benefit of the community of Nanostudio users and to help further interest in the platform. The original sounds can, of course, be licensed for universal, royalty-free use through purchasing the respective library that they came from (see above section detailing library sources). The song demo provided is the only element that is not free to use in any recording except when licensed from purchasing the library **Wobble Bass.**

This library is to remain free of charge at the discretion of platinumaudiolab.com and until or unless that changes may be freely distributed only without modification to the contents and packaging. A lot of hard work was put in to make this free so please give proper credit. We request that you link directly to our original source file found at:
